
Practitioner Launch Timeline — From Decision to First Client in 20 Days

Phase 1: Pre-Purchase Decision (Days 1–5)

Step 1: Review Materials & Initial Consultation

- Review the one-page program summary with your Majestic Peptides representative
- Understand Majestic Peptide program advantages and quality verification process
- Discuss your client population and approximate client counts
- Review product pricing and compound options

Step 2: Complete Inventory Turnover Calculator

- Fill out expected client volume per compound (Semaglutide, Tirzepatide, Retatrutide)
- Calculator shows monthly burn rate and months to exhaust \$30,000 inventory
- Target: 12 months or less burn time (indicates sufficient client volume)
- If burn time exceeds 12 months, discuss client acquisition strategy with your rep

Step 3: Metis Peptide Snapshot & Profit Presentation + Dashboard Review

Your representative forwards client count data to Metis, who creates a customized peptide snapshot and profit presentation. This will show projected revenue, break-even timeline, and different scenarios, provided before you commit. Metis will also review their complimentary 90-day program exclusive to Majestic clients.

Step 4: Submit PNC Healthcare Funding Application

- Your rep provides the 1-page application — 10–15 minutes (basic business financial information)
- Credit decision in approximately 1 week
- Terms: \$30,000 at 10% APR fixed, 5-year term, ~\$650/month, no prepayment penalty
- We provide ~\$700 in peptides monthly to offset your financing payment

Step 5: Schedule Education Sessions (Mandatory for Practices New to Peptides)

- Book two 2-hour remote training sessions with Christopher McDonald, Director of Practitioner Support
- Session 1: Clinical foundations, safety, administration techniques
- Session 2: Practice integration, pricing strategies, workflow optimization
- Must be completed before first client

Phase 2: Post-Funding Approval (Days 5–10)

Step 6: Funding Disbursement & Order Placement

- PNC disburses \$30,000 to you; you send it to Majestic Peptides
- Your rep confirms final compound split (Semaglutide, Tirzepatide, Retatrutide quantities)
- Majestic places order with Pro Peptide Solutions (sourcing from USP 797-certified USA manufacturing facility)
- No cash out of pocket required

Step 7: Inventory Ships from USP 797-Certified USA Facility

- Compounds manufactured in a USP 797-certified facility and packaged in South Carolina
- Lab visits can be arranged to see the production facility in person
- Each lot ships with third-party Certificate of Analysis (COA)
- Delivery within 5–7 business days from funding approval

Phase 3: Getting Ready for Clients (Days 10–15)

Step 8: Complimentary 90-Day Metis Advanced Practice Optimization Service

After launch is confirmed, Metis provides a customized interactive Peptide Dashboard plus ongoing consultations to optimize your entire practice:

- Optimized pricing guidelines based on your market
- Operational analysis and efficiency improvements
- Benchmark data from other providers in the Majestic R&D network
- Early awareness of market changes and trends

Step 9: Complete Training & Workflow Setup

- Both education sessions completed with Chris McDonald
- Documentation toolkit delivered: consent templates, adverse event forms, dosing charts, EMR integration guidance
- Practice workflow reviewed with account manager: client intake, consent process, follow-up protocols
- Staff roles assigned and documented

Step 10: Treat First Clients

- Begin treating clients using protocols from training
- Revenue begins immediately, offsetting the \$650/month financing payment
- Ongoing support available from Metis and Majestic Peptides
- 90-day milestone: 10–30 clients treated, workflow documented, reorder cadence established, 3 Metis action items implemented

Product Pricing & Selection

All compounds sourced via Pro Peptide Solutions from a USP 797-certified USA manufacturing facility — third-party COA for every lot.

Compound	Vial Size	Price / Vial	Price / mg	Vials in \$30k Package
Semaglutide	30 mg	\$262.50	\$8.75/mg	~114 vials
Tirzepatide	200 mg	\$750.00	\$3.75/mg	~40 vials
Retatrutide	60 mg	\$525.00	\$8.75/mg	~57 vials

Financing Terms

Loan Amount	\$30,000 (minimum)
Interest Rate	10% APR (fixed)
Term	5 years (60 months)
Monthly Payment	~\$650/month
Approval Timeline	Approximately 1 week
Prepayment Penalty	None
Cash Option	Available — ask your rep for details

Quality & Compliance Standards

USP 797-Certified Facility & Lab Visits

Compounds are manufactured in a USP 797-certified facility and packaged in South Carolina. Lab visits can be arranged. “Trust us” is not enough, we welcome and encourage verification.

Third-Party Testing

- Every lot independently tested by TrustPointe Analytics or Chromate Labs
- COA confirms: identity, purity, quantity — verifiable via QR code or URL
- Purity results typically range from 99.75% to 99.85%

Compliance Documentation Toolkit (Included)

- Client informed consent templates (EMR-ready)
- Lot tracking and chain-of-custody logs
- Adverse event reporting forms and escalation protocols
- Reconstitution and storage instruction cards; EMR documentation guidance

Training Program — 4 Hours with Christopher McDonald, Director of Practitioner Support

Session 1 (2 hrs)	Clinical Foundations: mechanism of action, client selection, contraindications, injection prep, reconstitution, safety monitoring
Session 2 (2 hrs)	Practice Integration: EMR documentation, consent protocols, cash-pay pricing, ROI optimization and expansion planning
On-Demand	HD recordings, dosing charts, titration guides, adverse event forms, supply chain checklists, future protocol updates
